Indigo (27.0) - User Management, Brightcove Integration, simplified project creation and more!

Release Overview

What's New

1. A new way to create projects
2. Brightcove integration that allows you to use videos from your Brightcove account in an Individeo project
3. New User Management Module for admins to add users into the company

Release Details

INDIVIDEO Portal

New Create Button

This release includes a new 'Create' button shown below in the homepage of Individeo that allows you to quickly get started with your video project.
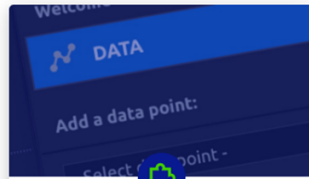

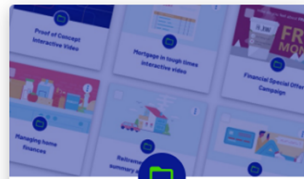

Once you click on 'Create' you will be displayed the following options
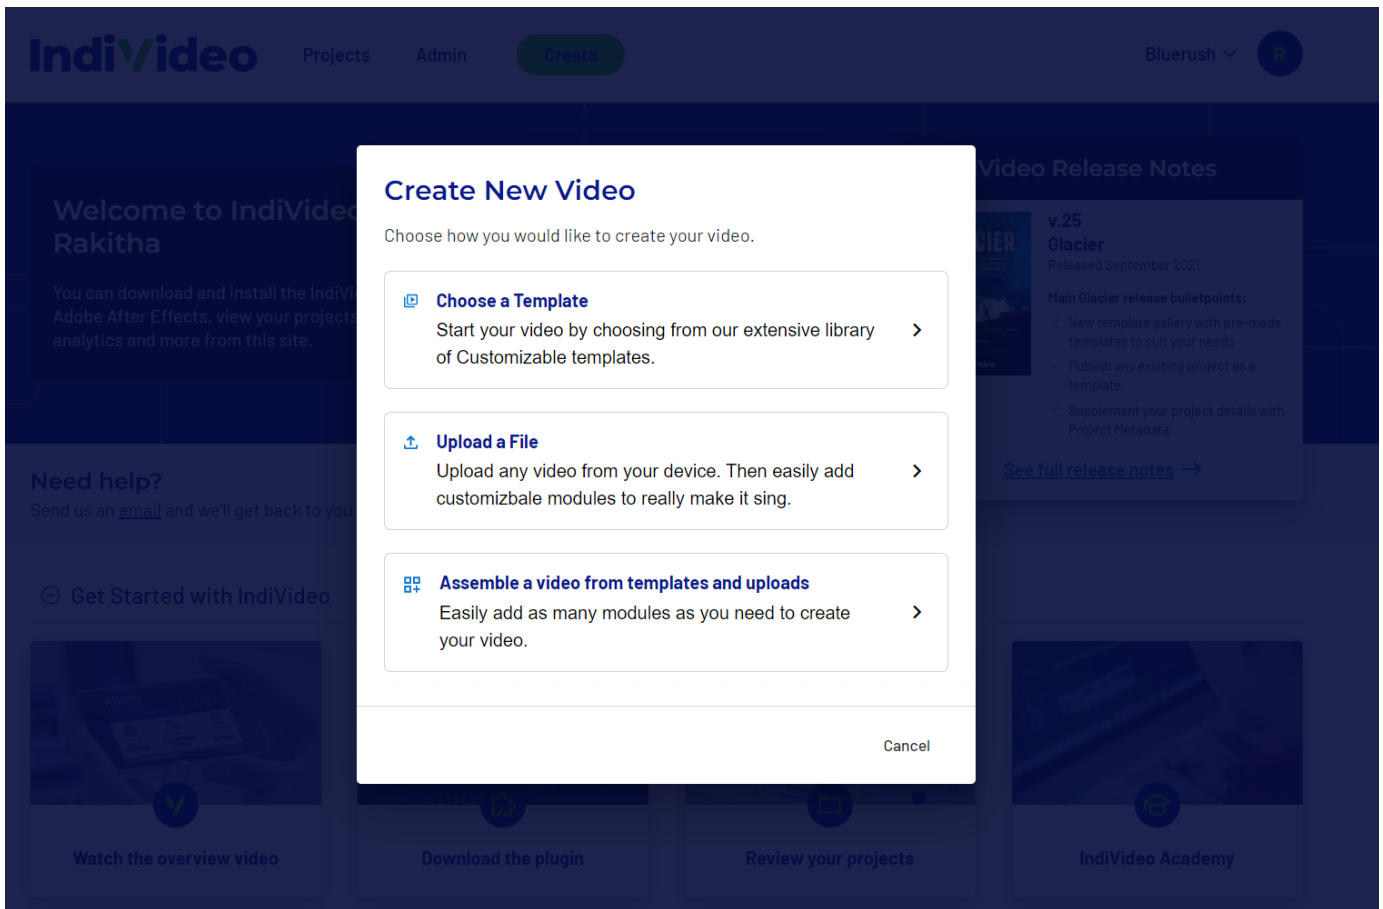

Choose a Template

This will redirect you directly into the template gallery to get you started with a project you desire. You can choose from multiple available templates that suite your needs.

Upload a File

Already have a video file that you want to share with others? Great, then simply click on 'Upload a file'. Give your project a name as shown below in the next step.
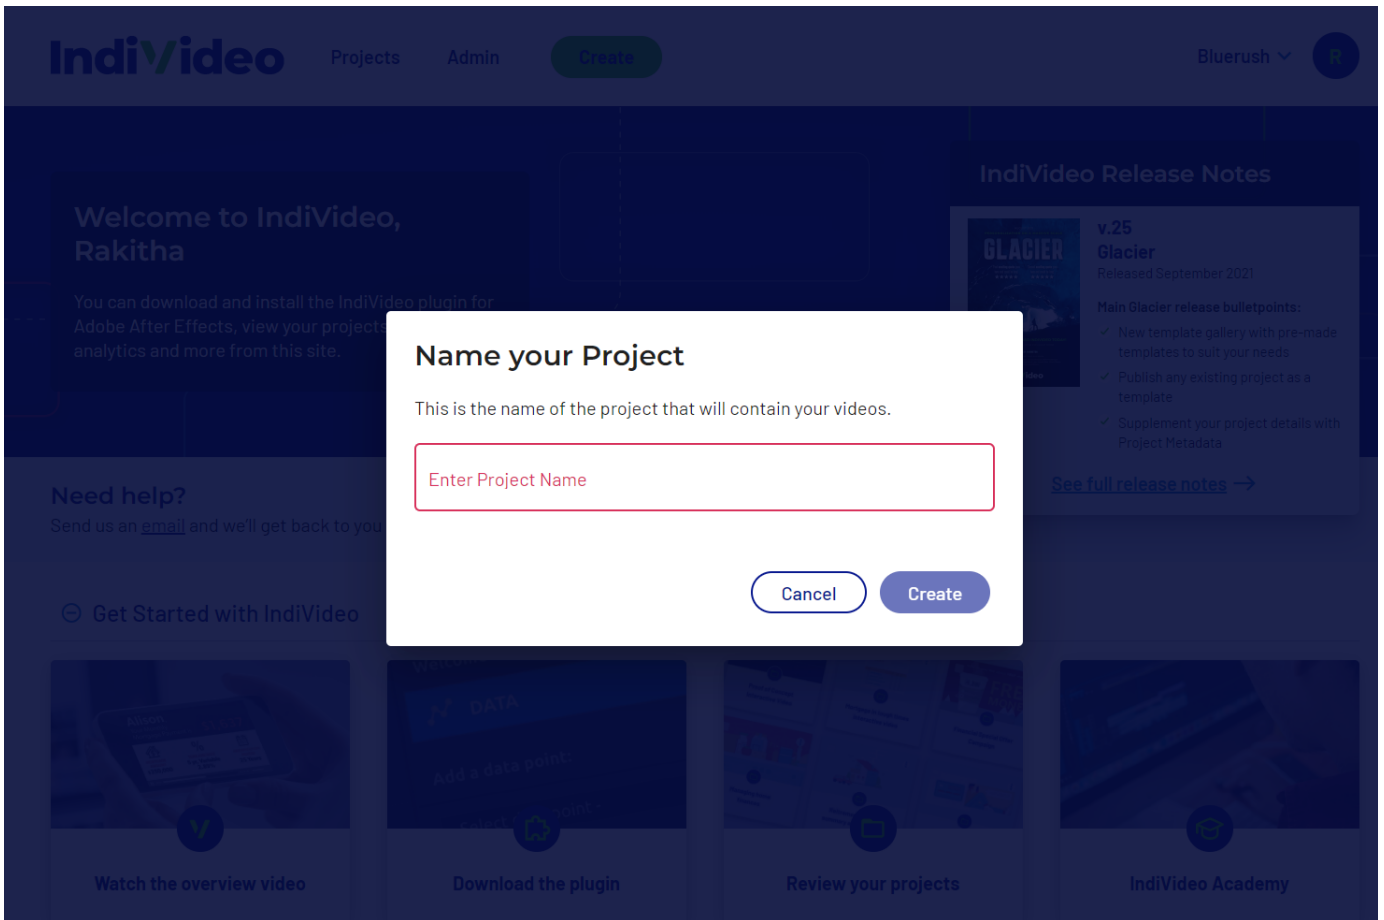

Next you will be redirected to your new project where you can upload your video as shown below.
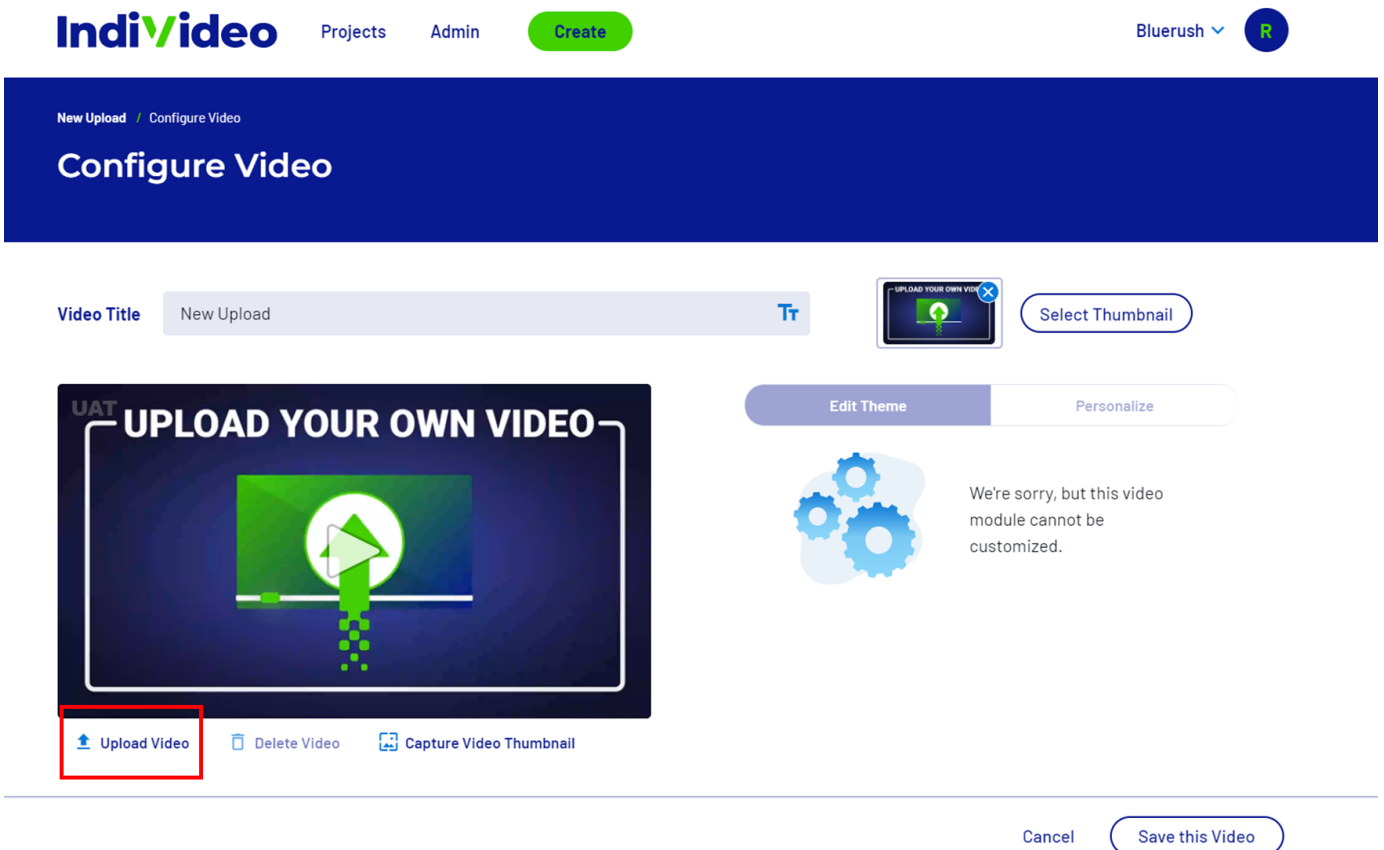

Already have several projects created in Individeo? Do you want to bring them all together into one amazing cool new video?

Then click on Assemble a video option and start by giving your project a name. Once you provide a project name, you will be redirected to the following UI. This is our new timeline view, (discussed in our previous release note) that gives you greater flexibility in managing video modules.

dfront.net...

Click on the 'Add module' button the following UI will be displayed. Here you will be able to see your existing videos created from other projects under the 'From Project' section. And you can search Brightcove videos from 'Search Brightcove' section (more on that later).
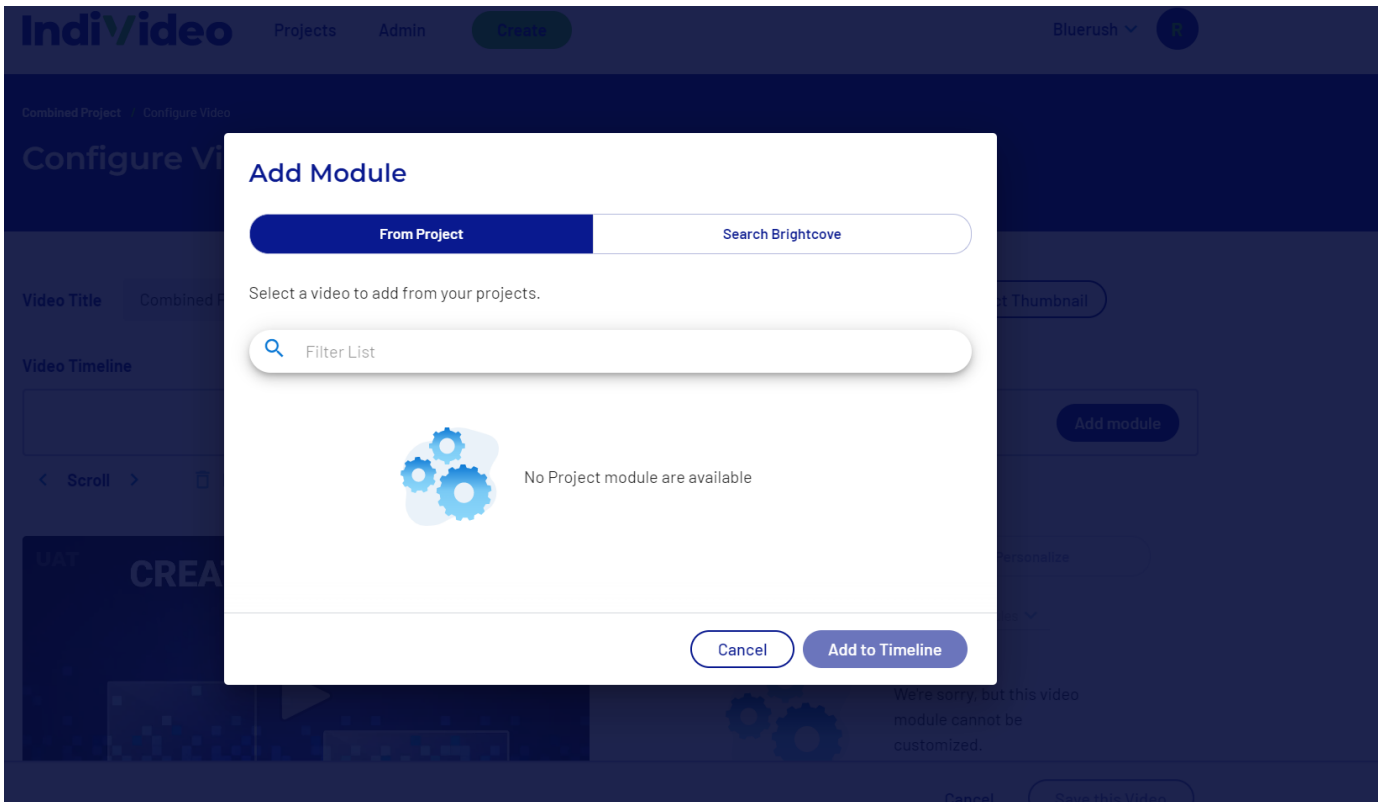

⚠ In order for your existing project videos to appear under the 'From Project' section, you need to ensure that you have projects with media items promoted to the 'PROD' status. If not you will not see any videos and see the above screen.

Brightcove Integration

Introduction

Brightcove is a video communication platform used worldwide to publish and distribute video on the Web. Our latest integration with Brightcove will allow you to use your existing Brightcove videos with Individeo.

Integrating to Brightcove

First you must integrate your Brightcove account with Individeo, you have to do this only once. Go to any project of you liking and click on the Integration tab below.

DATA FILE UPLOAD

BRIGHTCOVE®

The following screen will be displayed, here since I have already connected to Brightcove, you seen the green tick mark with 'Connected' you will not see this the first time you do this.

BrightCove Integration

Brightcove Integration

Enter your Brightcove API Access Key and Access Secret to connect to your Brightcove account. You will then be able to access your Brightcove library when you add a module to the video timeline.

Status: ✓ Connected

| Brightcove API Account ID | |
| Brightcove API Access Key | |
| Brightcove API Access Secret | |

Cancel   Register

In this section enter your Brightcove credentials and click 'Register'. You should already have this information if you are using Brightcove. If everything goes well, you should also see the 'Connected' icon, as shown above. If not, it will display a connection error and you should try again.

Adding Brightcove Videos to Individeo.

As discussed in the section 'Assemble a video' of this release note, next simply create a project of this kind and click on 'Add module'. In the following screen click on 'Search Brightcove'
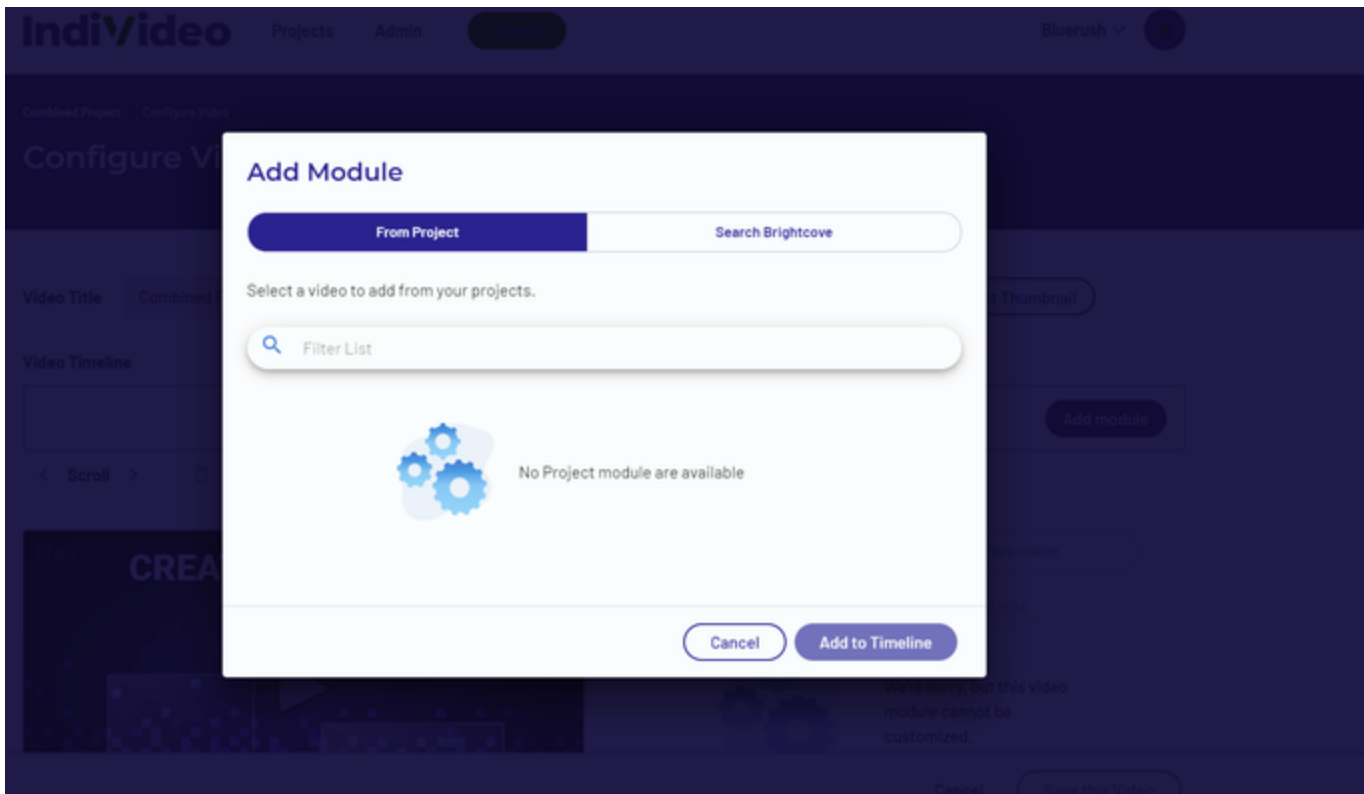

You will be able to see your existing Brightcove videos as shown below. You can also search for a video, simply enter a search term and press Enter. This text field only accepts once keyword and not comma separated values.

Next hover over a video and you will see the 'Select' button as shown below.

Click on it and then click 'Add to Timeline' and you will be able to see the video added to your timeline as shown below.
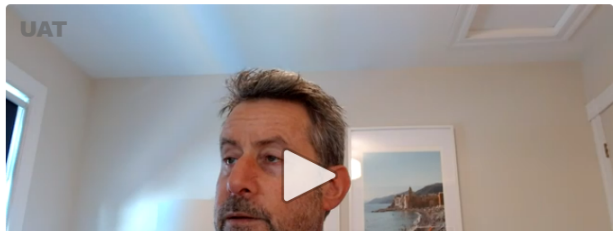

⚠️ You can only select one Brightcove video at a time. We are working on improving this and allowing you to add more.

Since these videos have no personalization elements, you will not be able to personalize them, but you can always have them in the middle of your existing Individeos to make your videos more exciting!

Improvements to User Management

We have introduced a new user management module that will allow the admin users of a company to add more users into Individeo.

When you login to Individeo with your admin credentials, you will be able to see the following new tab called

'Admin'
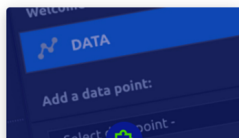

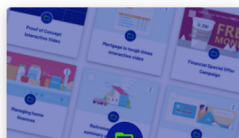

Once you click on the above button, you will be redirected to the following page. Here you will be able to perform the following functions

1. Add a new user to the company
2. Search for existing users

Admin

ALL USERS	USERS BY PROJECT	COMPANY

Add User

Show All ▼   🔍 Search

USER NAME	COMPANY	ROLE	STATUS
2 2539758a22	Bluerush	Author	Enabled
3 33a4b02586	Bluerush	Author	Enabled
5 586163e9ee	Bluerush	Author	Enabled

Adding a new User

To add a new user, click on the Add User button which will take you to the following screen.

This involves a simple 2 step process where, you first enter an e-mail address and press 'Enter' or simply click outside the text area for the platform to understand you have entered an e-mail.

You can enter **multiple** e-mail addresses by separating them with commas, as shown below. Next click on Go to Step 2.

IndiVideo

Projects   Admin   **Create**   Bluerush ⌄   R

Add Users Accounts

| 1 | Email addresses | > |
| 2 | Roles/Permissions | > |

Step 1 - Enter email addresses

Enter one or more email addresses of users to add, separated by commas.

jamescook@mail.com, aruthurcurry@hotmail.com

Cancel   Go To Step 2

IndiVideo

In step 2 as shown below, the admin will be able to configure the role of these new users and configure the following.

1. Auto-join new projects - Ensure these users have access to all projects created in the future
2. Project access - Ensure these users have access to all existing projects

Add Users Accounts

1. Email addresses >
2. Roles/Permissions >

← **Step 2 - Roles and Permissions**

Assign a role, permissions and access to projects for each user to be added. Then send your invitations.

jamescook@mail.com ⋮

User role	Author ▾
Auto-join new projects	Yes ▾
Project access	☑

aruthurcurry@hotmail.com ⋮

User role	Author ▾
Auto-join new projects	Yes ▾
Project access	☑

Cancel   Send Invites

Clicking on the 3-dot icon below will allow you to remove the user from this list before finalizing.

Add Users Accounts

← **Step 2 - Roles and Permissions**

Assign a role, permissions and access to projects for each user to be added. Then send your invitations.
